

One Wheel Leeds – Risk Assessment

Hazard	Control Measure(s)
Riders' health and stamina	Attendees are fully informed of the likely demands of the activity to enable them to make an informed decision around attendance.
Attendee's limited ability	Riders are advised of the benefits of wearing protective equipment. Basic first aid kits are present for all club organised activities and ICE details are collected.
Riders' equipment failure	Recommended wheel sizes and likely equipment demands are given for each activity. Event leaders/officials will endeavour to make comment if they are concerned about the ability of an attendee's equipment to survive the activity or they notice anything of concern. Club equipment is maintained regularly.
Adverse weather	Attendees are advised of the weather forecast before any outdoor activities. In the event of weather conditions that could affect the safety of attendees, cancellation will be considered.
Other road/trail users	Rides are planned to avoid busy routes (for both motor vehicles and other cycles) as much as possible. Route specifics are explained in advance whenever possible, and enroute. Routes are ridden in advance whenever possible, especially when less experienced riders will be present.
Highway design or maintenance/trail obstacles & features	Routes are ridden in advance whenever possible, close to the planned activity date. Route specifics are provided to attendees in advance and enroute. Alternatives/bypasses are provided where possible.
Sudden rider dismounts	Riders are advised to give at least as much space as they require to stop between them and others, and to give ample space for manoeuvring. More space should be given when riding off-road.
Transmissible diseases	Esp. COVID-19. The club will follow government guidance for indoor and outdoor activities. Riders are asked to not attend if they are showing symptoms or have tested positive for COVID-19 within the last 7 days.
