DOGGY PEDALLING

MAKE WALKIES MORE BIKE FRIENDLY

Not your best friend?

Here's some advice from the RSPCA about dealing with any aggressive mutts you might meet:

bit.ly/rspca-aggressive-dogs

1 GoPro Fetch Dog Harness Mount £34.36

Enliven that seen-it-all-before footage of singletrack riding with dog ears, undergrowth, startled squirrels, and possibly other dogs' bums. You'll need a GoPro, of course. The harness is not listed on GoPro's website, oddly, but is on amazon.co.uk.

2 Babboe Dog-E £2,399

An electric-assist cargo trike specifically for dog owners, the Dog-E is "suitable for multiple dogs and/or 1-2 children". It has rings inside for leads to stop them jumping out (dogs, not children), plus a ramp.

babboe.co.uk

3 Basil Pluto XL £99.99

A front-fitting wicker basket for (Basil say) "animals", this looks better suited to a Jack Russell or small terrier than, say, a cat or a guinea pig. Includes a dog cushion; the wire top is extra. basil.com

4 Rex Specs Dog Goggles \$79.95+

Protect your pet's eyes from UV, windblown debris, mud, or grass seeds whether they're sticking their head out of a cycle trailer at speed or racing trails on foot. rexspecs.com

5 Burley Tail Wagon ~£450

There are quite a few dog trailers these days. Burley were among the first and the Tail Wagon is one of the best. It's lightweight, folds flat for storage, and has a removable floor for cleaning. burley.com

6 Bikejor Starter Kit with Non-Stop Line Harness £89.99

Bikejoring is riding a bike with a dog pulling you. Yes, I can see how this could go very wrong, but it really is a thing. There are even competitions. innerwolf.co.uk

7 Tractive GPS Tracker for Dogs £44.99

A GPS that fits to a collar, this works as an activity monitor and a live tracker, so you'll always know where your pet is. Monthly sub (from £3.33) required. tractive.com/en
